The ones you can trust.

A1 Garage Doors established in 1999 have built a highly respected and professional garage door repair and sales service covering Newcastle and north east. This company has been created with an intention to provide excellent service to the community.

The owner has been in business for over 20 years. His knowledge is well diversified in commercial and residential door openers, entry systems, and garage doors. A1 Garage Doors are eager to assist you with pride in every service, whether it's to supply and fit you a garage door or fix an existing one.

A1 Garage Door Construction

All our doors are constructed from interlocking 77mm twin walled aluminium slats and filled with CFC-free insulating foam, which combines strength whilst helping increase energy efficiency with a typical U value of 5.2 w/m² K. The doors can easily span an opening up to 5400mm wide and come complete with a heavy duty weather seal to the bottom section.

Security

Locking is actively engaged by the anti-lift geometry locking straps when the door is closed.

Safety

All our doors are supplied with an infra-red photo electric safety beam as standard, which if the zone of the doors path detects an obstruction whilst closing, the door will automatically stop and return to the open position. This system has benefits over other manufacturers standard bottom rail safety devices, as it detects the obstruction before the door actually touches it, thus preventing possible damage.

Why choose us?

- **CRB police checked and Fully Insured** Engineers, so you have piece of mind while they are working.
- **Highly Experienced** Engineers with over 18 years experience
- **Local** Family Business you can count on
- **Free** Call Out Charge and Free Quotations available on request
- All work is Guaranteed because we care about your door as much as you do.

Finish

The door curtain is manufactured from corrosion-resistant aluminium and coated with an anti-abrasive polyester finish, which requires only an occasional wipe with a cloth and mild soapy water.

Manual Override

In the event of a power failure, a manual winding handle ensures that the door can be opened from inside the garage. An external manual winding system is also available as an optional extra if there is no other available access into the garage.

Remote Control Operation

Each A1 Garage Door door comes with remote control operation and 2 executive style compact handsets with key fobs. Rolling code technology ensures that security is paramount with a unique code generated each time the handset is activated. The remote control operation allows you to open and close the door from the convenience of your car - 'perfect for those wet and windy days!' The control box has the option of a timed auto close facility and outputs for the connection of a separate 240 volt timed courtesy light and also for the connection for an internal push button or key switch.

Motors

At the time of manufacture, all Autotherm motors are designed to lift at least double the weight of the door that they are being fitted to. They also have 2 limit switches for both the open and close direction, so if one fails, the secondary one is there for back up, thus ensuring a long and trouble free life.

Guarantees

All A1 Garage doors come with a comprehensive return to base 12 months parts warranty.
