Hörmann brand quality

Reliable and oriented towards the future

“A good reputation must be earned.” (August Hörmann)

In line with the founder’s philosophy, the Hörmann brand today is a true promise of quality. The family-owned company has over 75 years of experience in door and operator construction and, with sales of over 20 million doors, is no. 1 in Europe. This makes a Hörmann operator a reassuring purchase.

German quality

All doors and operator components are developed and manufactured by Hörmann, are perfectly matched to each other and tested and certified by independent, recognised institutes to ensure your safety. They are manufactured in Germany according to the DIN ISO 9001 quality management system and fulfil all the requirements of European standard 13241-1. Our highly qualified employees work intensively on new products, continual further developments and improvement to details. Patents and unique products on the market are the result of this.

Door operators for generations

Endurance tests under real conditions ensure mature series products with Hörmann quality. Thanks to this, as well as excellent technical solutions and uncompromising quality assurance, you receive a 5-year warranty on all Hörmann garage door and entrance gate operators.

An eye on the future

Hörmann is setting a good example. This is why, from 2013 onwards, the company will obtain up to 40% of its required energy from green sources and will continue to increase this percentage. At the same time, many tonnes of CO₂ are saved each year thanks to the introduction of an intelligent and certified energy management system. And last but not least, Hörmann also offers products for sustainable construction.

Hörmann BiSecur

The modern radio system
for garage door and entrance gate operators

Convenient and safe with bi-directional radio technology

Our bi-directional, high-security BiSecur radio system is based on future-oriented technology that allows you to conveniently and safely operate garage doors, entrance gates, lights and much more. Functions are operated using exclusive hand transmitters. Inquiry of the door position is an especially convenient feature: you can see if your door is open or closed at the press of a button.

**Especially secure and certified
by the Ruhr University Bochum**

Only from Hörmann

PATENT PENDING

Certified security with a stable and interference-free range

The newly developed, extremely secure BiSecur encryption protocol makes sure that no-one can copy your radio signal. It was tested and certified by security experts at Bochum University.

128-bit encryption

Benefit from the same high security level as in online banking.

reddot design award
honourable mention 2011

Innovative technology in an elegant package

The new, exclusive BiSecur hand transmitters are set apart by a black or white high-gloss surface in a piano lacquer look, as well as by an elegant shape that fits easily in the palm of your hand. Chrome caps create accents, completing the high-quality look.

Hörmann's BiSecur hand transmitters have been awarded a design prize by an international jury.

Take a look at the video at:
www.hoermann.com/videos

A complete overview of BiSecur hand transmitters can be found starting on page 26.

Convenient inquiry of the door position

Convenient and safe with bi-directional radio technology

You no longer have to go out in all kinds of weather to check that your garage door is closed. At the press of a button, the colour of the LED on the HS 5 BS hand transmitter indicates the position of the door. Press the button* again to close the door.

* An additional photocell is required for operation without visual contact to the door.

PATENT PENDING

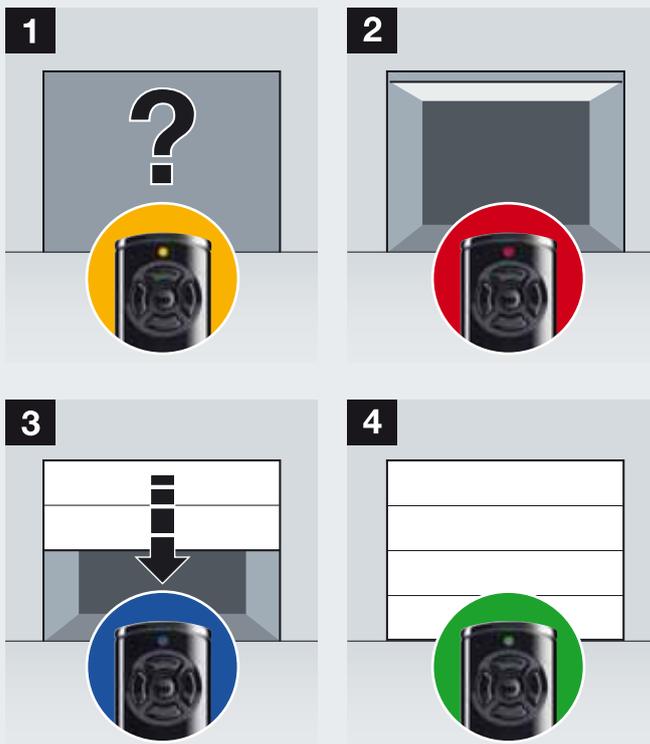

With the HS 5 BS hand transmitter, you can check whether your door is closed at the press of a button.

- As standard with garage door operator SupraMatic
- Optional for garage door operator ProMatic
- Optional for entrance gate operators RotaMatic and LineaMatic **// NEW** from July 2013

Take a look at the video at:
www.hoermann.com/videos

Inquiry of the door position

1 To check whether the door is closed, press the inquiry button on the HS 5 BS and then press the function button to open the door. The LED is illuminated in orange.

Door position reporting

2 The LED will flash in red if the door is still open. A closed door is indicated by a green LED.

Convenient closing with automatic door position reporting

3 You can close your door by pressing the function button once more. **Note:** An additional photocell is required if the door is not within view.

4 The green LED then indicates that your door is closed.

Good reasons to try Hörmann

Garage door operator quality features

1

Safe

2

Reliable

Only from Hörmann

Anti-lift kit

Burglars have a tough time when it comes to Hörmann automatic garage doors: When the garage door is closed, the anti-lift kit automatically engages in the guide rail stop, immediately locking and securing it against forced opening. This lock is purely mechanical and, in contrast to operators from other manufacturers, effective even in the event of a power failure.

Take a look at the video at:
www.hoermann.com/videos

Automatic cut-out

The reliable automatic safety cut-out securely stops the door if it encounters an obstacle. For even more protection and safety, we recommend fitting a non-contact photocell. This is a standard feature in the Hörmann SupraMatic P operator.

Soft start and soft stop

Your door opens and closes quietly and smoothly. The start and stop phases can be individually set for your garage door. This protects your garage door, allowing you to enjoy it for years to come.

Tested safety

Hörmann garage door operators are perfectly matched to the sectional garage doors and have been tested and certified by TÜV Nord in accordance with the TTZ directive "Break-in resistance for garage doors".

3

Super-fast

SupraMatic operator

You can enter faster and more safely with the SupraMatic operator when combined with a Hörmann sectional garage door. An opening speed up to 50% faster means more safety and less stress on high-traffic streets. Compare the opening speed of the SupraMatic operator with conventional operators.

Take a look at the video at:
www.hoermann.com/videos

Garage door operator SupraMatic

The supra-fast operator with an array of additional functions

SupraMatic
as standard with
a black HS 5 BS
hand transmitter

With the combination of speed and convenience, your garage door opens faster, allowing quicker access from the street into your garage. The SupraMatic has many added functions, such as being able to switch the lighting on and off with your hand transmitter and the convenient option of an additional opening height to ventilate your garage. An operator cover made of brushed aluminium also provides the SupraMatic with a very elegant appearance.

Low power consumption costing only around €3 per year**

Convenient inquiry of the door position

You can use the standard HS 5 BS hand transmitter at any time to check that your garage door is closed.

Faster door opening

An up to 50% faster opening speed gets you from the street into your garage sooner.

Additional opening setting

With an adjustable opening option, you can ventilate your garage without completely opening the door.

Halogen lighting can be switched on / off separately

The operator lighting can be switched on and off separately, via your hand transmitter or the IT 3b optional internal push-button unit. Optionally available as an LED reflector lamp.

Easy-to-use programming

All of the operator functions can be set very easily by entering a two-digit number.

High security

The standard EL 101 photocell for the SupraMatic P immediately detects persons and objects. Families with children especially appreciate this level of safety.

SupraMatic E

Pull and push force: 650 N
Peak force: 800 N
Opening speed: max. 22 cm/s
Door width: up to 5500 mm
(max. 13.75 m² door surface)

SupraMatic P

incl. photocell
Pull and push force: 750 N
Peak force: 1000 N
Opening speed: max. 22 cm/s
Door width: up to 6000 mm
(max. 15 m² door surface)
For heavy timber doors and doors with wicket doors

SupraMatic H / HD

For collective and underground garages.
Your Hörmann partner will be pleased to assist you.

* The complete warranty conditions can be found at: www.hoermann.com

** With 5 door cycles per day and an electricity price of 0.25 euros/kWh

Garage door operator ProMatic / ProMatic Akku

Reliable function at an attractive price

ProMatic as standard
with a black HSE 2 BS
hand transmitter

ProMatic garage door operators feature the same proven Hörmann technology as all Hörmann premium operators. This guarantees reliable function – at an attractive price.

Even in a garage without a mains connection, you can enjoy the comfort and convenience of an operator. The ProMatic Akku makes it possible. Easy to transport, it can be recharged in a matter of hours, even conveniently via the optional solar module.

Optional inquiry of the door position

You can use the optional HS 5 BS hand transmitter at any time to check that your entrance gate is closed (not for ProMatic Akku).

Additional opening setting

With the individually adjustable second opening height, you can ventilate your garage without completely opening the door (not for ProMatic Akku).

ProMatic Akku

A convenient solution for garages without a power connection. Similar to the recharging of a mobile phone, the battery is simply connected to a power outlet using the supplied charger.

Easy overnight recharging

A practical carrying handle and its light weight make it easy to transport the battery for charging. The solar module makes charging even more convenient.

Solar module (optional)

A practical extension to ProMatic Akku takes over battery charging.

Delivery includes fitting material, 10 m connecting lead and charge controller, dimensions: 330 x 580 mm

ProMatic

Pull and push force: 600 N
Peak force: 750 N
Opening speed: max. 14 cm/s
Door width: up to 5000 mm
(max. 11 m² door surface)

ProMatic Akku

For garages without power connection
With 868 MHz fixed code
(without door position inquiry)
Pull and push force: 350 N
Peak force: 400 N
Opening speed: max. 13 cm/s
Door width: up to 3000 mm
(max. 8 m² door surface)

Battery

Operation period: approx. 40 days**
Charging time: 5 – 10 hours***
Weight: 8.8 kg
Dimensions: 330 x 220 x 115 mm

**ProMatic Akku
as standard with
black HS 4 BS
hand transmitter**

- * The complete warranty conditions can be found at: www.hoermann.com
- ** Based on an average of 4 door cycles per day and an ambient temperature of 20° Celsius
- *** Depending on the charging state

The Hörmann operator boom

Security both day and night with automatic locking

Only from Hörmann

1 Automatic door locking in the operator boom

When the garage door is closed, the anti-lift kit automatically engages in the operator boom's stop. The door locks immediately and is secured against forced opening. This process is purely mechanical and thus also functions without a power supply!

Take a look at the video at:
www.hoermann.com/videos

2 Exceptionally flat boom

An exceptionally flat boom – only 30 mm high – means that operators are easy to fit to any commercially available garage door and are therefore also ideal for retrofitting.

3 Emergency release from inside

To conveniently open the door from the inside in the event of a power failure.

4 Universal fitting bracket

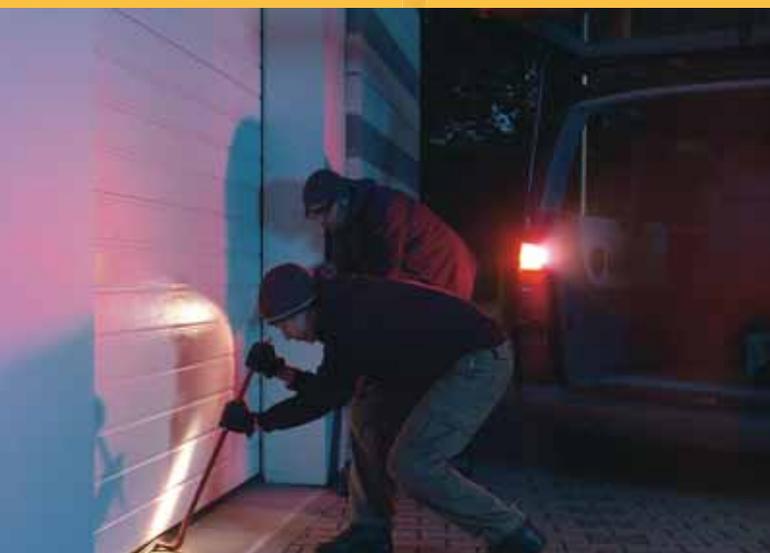

Fits all commercially available up-and-over and sectional doors.

5 Maintenance-free toothed belt

Reinforced with aramid fibres, the Kevlar toothed belt is particularly tear-resistant and quiet-running. It does not require grease or lubricants, providing an important advantage over chain or spindle operators.

6 Automatic belt tension

A strong spring mechanism tensions the toothed belt automatically, thus ensuring uniform, smooth running.

**As standard with all
Hörmann garage door operators**

6

Compact unit

Hörmann's doors, operators and booms form a compact, permanently connected unit. Additional control units and exposed, movable connecting leads are not necessary.

Simple installation

Hörmann operators can be installed easily and quickly. Operator booms can be fastened individually thanks to variable suspensions: Either to the ceiling or directly to the reinforced connection profile on the Hörmann sectional door (up to 3000 mm door width). An additional advantage: just one suspension is sufficient, even for long booms.

Centre installation

Centre installation of the operator rails on the door leaf results in uniform pull forces on the door. No canting, no wear, which is frequently the case with e.g. operators installed on one side.

Simple installation

For Hörmann sectional doors with a width up to 3000 mm, the operator boom can be fitted on the door connection profile.

Special track application for hinged garage doors

Thanks to simple assembly of the optional track application, retrofitting is also very easy.

Good reasons to try Hörmann

Entrance gate operator quality features

1

Safe

Automatic cut-out

Hörmann entrance gate operators work reliably during all opening and closing phases. The gate stops immediately if it encounters an obstacle. Non-contact photocells to detect persons or objects provide additional safety. They can be easily integrated in our elegant safety key switch post (see p. 37) and placed near the entrance to monitor the area of travel of your hinged or sliding gate.

2

Reliable

Soft start and soft stop

Hörmann entrance gate operators open quietly and reliably. The gate opens without a jolt and gently brakes before fully closing. This protects the gate and operator and does not disturb your neighbours.

Tested safety

Hörmann entrance gate operators work safely during all opening and closing phases. The operating forces for common door sizes and fitting situations have been tested and certified by TÜV in accordance with DIN EN 13241-1.

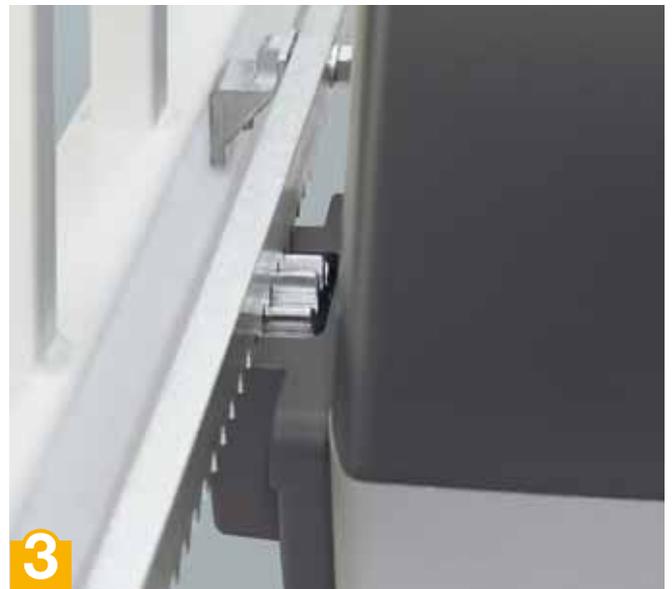

3

Robust

Top quality

High-quality entrance gate operators from Hörmann are decidedly robust, ensuring that they can remain in good mechanical condition over the long run. Weather-resistant and lasting material ensures long-term function. Our RotaMatic version also comes with integral heating for use in especially cold regions.

Hinged gate operator RotaMatic / RotaMatic Akku

A streamlined operator with an elegant appearance

As standard with
a black HS 4 BS
hand transmitter

Thanks to its modern, slimline design, Hörmann's RotaMatic hinged gate operator is the perfect partner for your beautiful hinged gate. Just like the design, the functional and safety features are also exemplary. You can enjoy the convenience of an operator even if there is no direct connection to the mains supply with the RotaMatic Akku.

Optional inquiry of the door position // NEW from July 2013

You can use the optional HS 5 BS hand transmitter at any time to check that your entrance gate is closed (not for RotaMatic Akku).

RotaMatic Akku

For entrance gates without a power connection.

Its battery is easy to transport and can be charged in a matter of hours, e.g. overnight.

Solar module (optional)

An optional solar module makes the system completely independent of the mains supply.

Delivery includes fitting material, 10 m connecting lead and charge controller.
Dimensions: 330 x 580 mm

Sound-absorbing seal (optional)

The operating forces for many door sizes and fitting situations using RotaMatic operators with optional sound-absorbing seal have been tested and certified by TÜV.

Electric lock (optional)

Hinged gates are subjected to enormous forces under high wind loads. An additional electric lock secures it from being blown open.

RotaMatic

Gate leaf width: max. 2500 mm
Gate leaf height: max. 2000 mm
Weight: max. 220 kg

RotaMatic P

Gate leaf width: max. 2500 mm
Gate leaf height: max. 2000 mm
Weight: max. 400 kg

RotaMatic PL

Gate leaf width: max. 4000 mm
Gate leaf height: max. 2000 mm
Weight: max. 400 kg

RotaMatic Akku

With 868 MHz fixed code
(without door position inquiry)
Gate leaf width: max. 2500 mm
Gate leaf height: max. 2000 mm
Weight: max. 120 kg

Battery

Integrated in a lockable control cabinet
Operation period: approx. 30 days**
Charging time: 5 – 10 hours***
Weight: 8.8 kg
Dimensions: 320 x 220 x 115 mm

* The complete warranty conditions can be found at: www.hoermann.com

** Based on an average of 4 door cycles per day and an ambient temperature of 20° Celsius

*** Depending on the charging state

Optional accessories

- Electric lock (recommended from a leaf width of 1500 mm)
- Sound-absorbing seal
- HNA emergency battery
- SK set (one-way photocell and warning light)
- HSK 3 lockable emergency release
- Integral heating for colder regions (down to 35°C)
- Track variants for special fitting situations

Underground hinged gate operator DTU 250

An almost invisible operator for attractive gates

DTU 250

Gate leaf width: max. 2500 mm

Gate leaf height: max. 2500 mm

Weight: max. 500 kg

A radio unit must be ordered separately for this operator. Technical clarification is also required. Please contact your Hörmann dealer.

The underground operator DTU 250 is an almost invisible and space-saving solution for use in private areas. We recommend floor fitting to create especially elegant gates.

Hinged gate operator DTH 700

An especially robust and powerful operator

DTH 700

Gate leaf weight: max. 7000 mm

Gate leaf height: max. 2500 mm

Weight: max. 1000 kg

A radio unit must be ordered separately for this operator. Technical clarification is also required. Please contact your Hörmann dealer.

Hörmann's DTH 700 operator is especially robust and powerful. For use in private and commercial applications.

Sliding gate operator LineaMatic

A compact and reliable operator

LineaMatic

Gate leaf width: max. 6000 mm
 Gate leaf height: max. 2000 mm
 Weight: max. 300 kg
 Self-supporting: max. 250 kg

LineaMatic P

Gate leaf width: max. 8000 mm
 Gate leaf height: max. 2000 mm
 Weight: max. 500 kg
 Self-supporting: max. 400 kg

LineaMatic H

Gate leaf width: max. 10000 mm
 Gate leaf height: max. 3000 mm
 Weight: max. 800 kg
 Self-supporting: max. 600 kg

A radio unit must be ordered separately for the operator LineaMatic H. Technical clarification is also required. Please contact your Hörmann dealer.

Highlights of the sliding gate operator LineaMatic include its compact, height-adjustable housing made of zinc diecast and glass-fibre reinforced plastic, as well as its reliable operator electronics.

Optional inquiry of the door position // NEW from July 2013

You can use the optional HS 5 BS hand transmitter at any time to check that your entrance gate is closed.

As standard with a black HS 4 BS hand transmitter

Sliding gate operator STA 400

For large and heavy doors

STA 400

Gate leaf width: max. 17000 mm

Gate leaf height: max. 3000 mm

Weight: max. 2500 kg

Self-supporting: max. 1800 kg

A radio unit must be ordered separately for this operator. Technical clarification is also required. Please contact your Hörmann dealer.

The sliding gate operator STA 400 is specifically designed for large gates. The matching control B 460 FU ensures precise gate travel and smooth stopping.

Innovative technology in an elegant package

The new BiSecur hand transmitters

Interference-resistant

Interference-resistant radio signal with a stable range

128-bit encryption

Benefit from the same high security level as in online banking.

Simple transmission

Simple transmission of coding. Simple copying from hand transmitter to hand transmitter.

Impact-resistant

The hand transmitter is very sturdy thanks to a permanently installed antenna.

Backwards compatible

The new BiSecur control elements are also suitable for the operation of all Hörmann operators with a radio frequency of 868 MHz (year of manufacture 2003 – 06/2012). (Querying the door position is not possible).

Mobile radio accessories

For every situation

red dot design award
winner 2007

Operate your entrance gate or garage door with a mobile radio transmitter that is as easy to use as your TV remote control. You decide whether you would like a hand transmitter that remains in the vehicle or one to keep on your key ring.

With Hörmann, everything fits together.
With just one hand transmitter you can operate your garage door, as well as your Hörmann entrance gate operator.

Hand transmitter HSD 2-A BS

Aluminium look,
2 button functions,
can also be used as a key ring

HSD 2-C BS

High-gloss chrome,
2 button functions,
can also be used as a key ring

Hand transmitter HSP 4 BS

4 button functions,
with button lock-out,
incl. key ring

Hand transmitter HSZ 1 BS

1 button function, for insertion in
vehicle cigarette lighter

HSZ 2 BS

2 button functions,
for insertion in vehicle cigarette lighter

HER 1 receiver

A receiver (1, 2 or 4-channel) is
needed to operate an additional
external light or a garage door
(of other make) using Hörmann
radio accessories.

HSZ hand transmitter

The inexpensive alternative to
expensive homelink systems:
integrated in an inconspicuous spot
in your car. Inserted in the vehicle's
cigarette lighter, the hand transmitter
HSZ is easily accessible and
convenient to operate.

Simple code transmission

Your individual hand transmitter coding
can be easily transmitted to another
hand transmitter.

Stationary radio accessories

For outside and inside

You decide how to automatically operate your garage door or entrance gate: using a code or transponder technology. The classic way with a key or via a distinctive fingerprint – the choice is yours!

Radio code switch FCT 3 BS

For 3 functions
with illuminated buttons

Radio code switch FCT 10 BS

For 10 functions,
with illuminated buttons
and protective cover

Radio finger-scan FFL 12 BS

For 2 functions and
up to 12 finger prints

Radio internal push button FIT 2

For 2 operators
or operator functions

Recessed radio transmitter

For two functions, in conjunction
with a commercially available recessed
switch. For central installation in
a hallway / living room within
sight of the garage door.

HSU 2: for all commercially available
switch boxes with 55 mm Ø connection
to the house mains supply

FUS 2: incl. 9 V battery/connection
option for voltages up to 24 V
(not shown).

With 868 MHz fixed code

Radio code switch

Open your garage easily
by entering a personal code.
No hand transmitter required!

Stationary convenience accessories

For outside

CTR 1d / CTR 3d code switch

For 1 or 3 functions
with hinged protective cover.

CTR 1b / CTR 3b code switch

For 1 or 3 functions,
with illuminated buttons
and weather-resistant
membrane keypad.

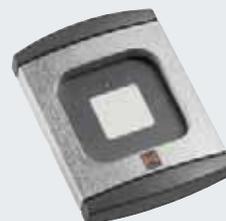

CTV 1 / CTV 3 code switch

For 1 or 3 functions,
especially robust,
protected against vandalism.

FL 12 / FL 100 finger-scan

For 2 functions,
to open the garage door
via a fingerprint. Can store
12 or 100 fingerprints,
respectively.

TTR 100 / TTR 1000 transponder key switch

For 1 function
with 2 keys (more on request)
for up to 12 / 100 / 1000 keys.

**Internal push button
IT 1**

With impulse button to open and close the door (for ProMatic, SupraMatic and ProMatic Akku)

**Internal push button
IT 1b**

You can conveniently open the door by pushing the large, illuminated button on the IT 1b (for ProMatic and SupraMatic).

**Internal push button
IT 3b**

Along with a large illuminated button for conveniently opening the door, the internal push button IT 3b has two additional buttons. These can be used to control the operator light and completely switch off the radio-control system for the operator, e.g. while you are away on holiday (for SupraMatic).

**Internal push button
PB 3**

With illuminated impulse button to open or close the door, button for garage light and button to switch off the radio system (for SupraMatic).

**Key switch
STUP 40 / STAP 40**

In recessed and surface-mounted versions, including 3 keys.

**Key switch
ESU 40 / ESA 40**

In recessed and surface-mounted versions, including 3 keys.

Key switch post STS 1

The key switch post STS is available with one or two adapters for command units (must be ordered separately). Transponder key switches, code switches, finger-scans or key switches can be installed. The post is White aluminium (RAL 9006), the cover and base are Slate grey (RAL 7015). Protected for outdoor use in accordance with IP 44.

Height: 1250 mm, base diameter: 300 mm.

The illustration shows a key switch post with fitted STUP 40 key switch (optional).

Everything for Emergencies

Innovative ideas for comfort and security

Hörmann products are always a bit more sophisticated. Many useful details make it easier to operate your door with increased security. Photocells effectively secure your garage door or gate, families with children especially appreciate this level of safety. Thanks to emergency battery, you can reliably open your door even after a power failure.

Emergency battery HNA for garage door operators

With this emergency power supply, you can bypass network power failures for up to 18 hours and max. 5 door cycles. The emergency battery recharges itself during normal operation. Emergency batteries can be added to all current Hörmann garage door operators.

Emergency battery HNA Outdoor for entrance gate operators

The RotaMatic hinged gate operator and LineaMatic sliding gate operators can also be equipped with an emergency power supply to bridge power failures. They can be universally fitted to the wall or floor.

Additional emergency release

For garages without a second entrance, we offer you the following options to open the door from the outside in case of emergency (e.g. power failure):

Sectional doors without a handle

Emergency release lock with round cylinder (cannot be integrated in the home locking system) or emergency release handle in a choice of 8 styles, including lock (can be integrated in the home locking system).

Up-and-over doors and sectional doors with a handle

Emergency release (not shown)

Photocell

Hörmann's reliable one-way photocell systems immediately stop the gate if the light beam is interrupted. They can be directly fitted to the door or integrated in STL key switch posts.

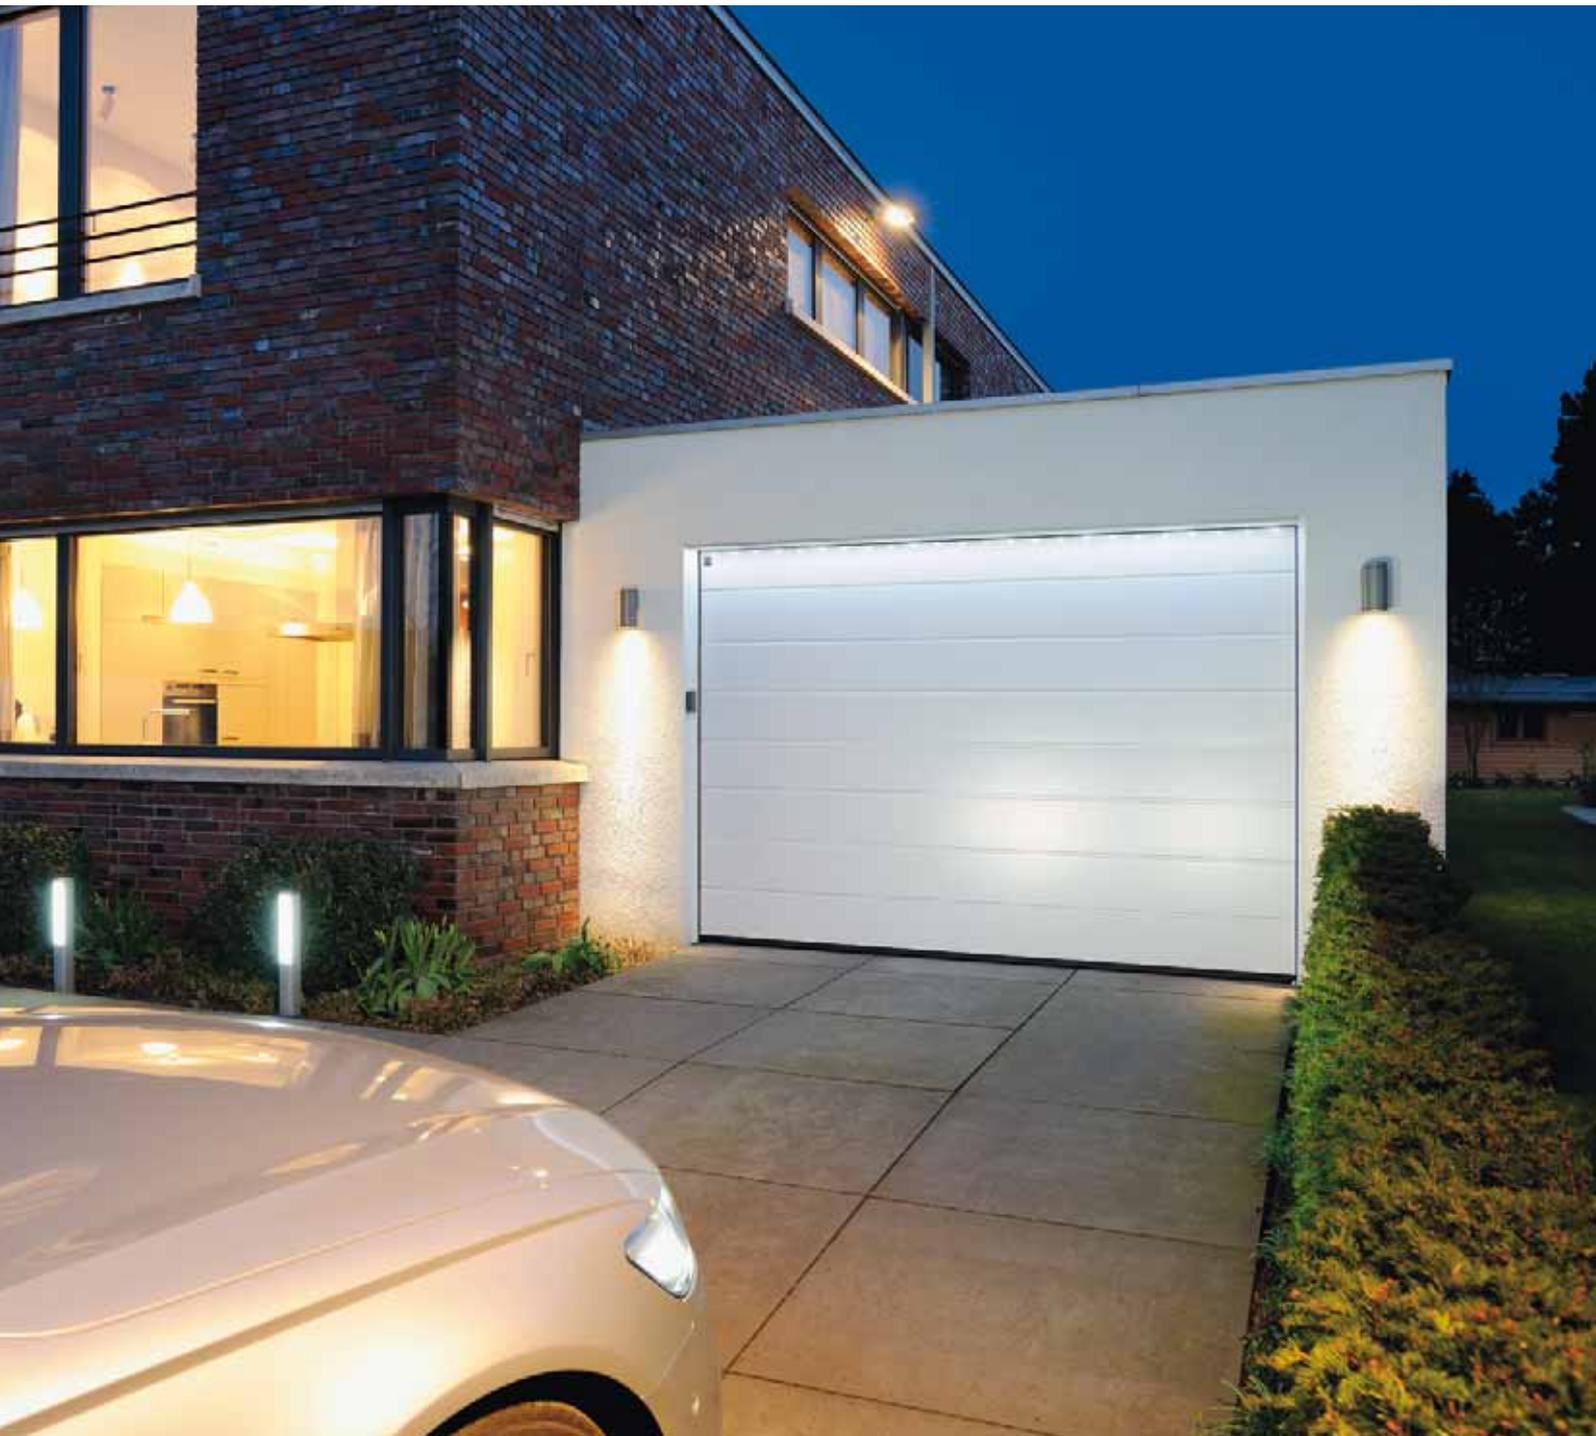

Signal lamp

A warning light on your entrance gate provides you with extra security day and night.

Light and safety accessories

Technology for entrance gates

Hörmann key switch post sets made of weather-resistant, anodised aluminium offer you more light and security. The posts can be individually equipped using variable inserts for photocells and LED light modules.

Ensure a bright, safe entrance area

Light key switch post SLS

The light key switch post SLS with an LED light module is available in heights of 550 mm and 1080 mm. The 1080 mm key switch post is also available with two LED light modules to improve the lighting in your entrance area.

SLS-K
with LED light module
Height 550 mm

* A photocell is required for doors with wicket doors.

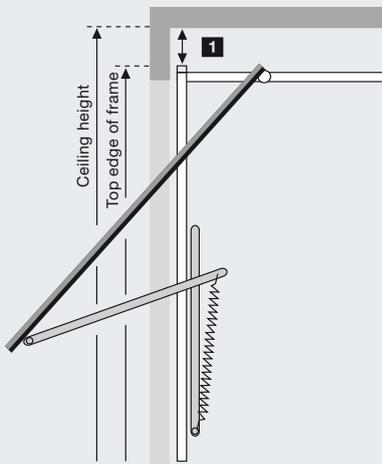

** > 5500 mm only in conjunction with an FS 60 operator boom and fitting bracket

Type of boom	Overall length	Travel distance
K Short boom	3200	2475
M Medium boom	3450	2725
L Long boom	4125	3400

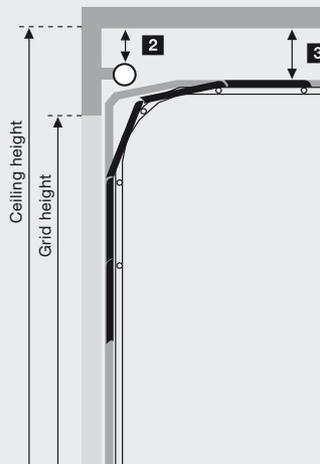

Boom applications for Hörmann garage doors	Height
K Up-and-over garage doors (N 80 and DF 98) Sectional garage doors with track application N Sectional garage doors with track application Z, L, H	Up to 2500 Up to 2250 Up to 2125
M Up-and-over garage doors (N 80 and DF 98) Sectional garage doors with track application N Sectional garage doors with track application Z, L, H	Up to 2750 Up to 2500 Up to 2375
L Sectional garage doors with track application N, Z, L, H	Up to 3000

Note the travel distance for doors from other manufacturers!

1 Required clearance for up-and-over garage doors

N 80	0
N80, style 905, style 941 or with timber infill	15
DF 98, DF 95, DF 80	65

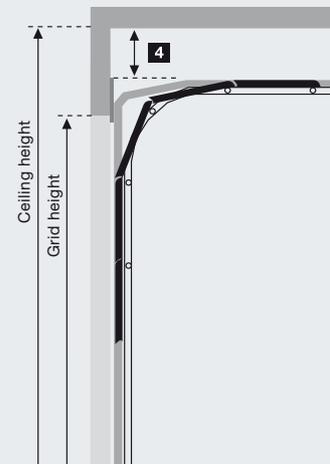

2 Required clearance for sectional garage doors with torsion spring assembly

With track application N ceiling height = grid height + 210	0
With track application H	0

3 Required clearance for sectional garage doors with torsion spring assembly

With track application L ceiling height = grid height + 115	15
--	----

4 Required clearance for sectional garage doors with tension spring assembly

With track application Z ceiling height = grid height + 115	15
--	----

Clearance for doors from other manufacturers

Between the highest point of door travel and the ceiling	30
--	----

Mains connecting lead					
		230 V, NYY 3 × 1.5 mm ² (on-site)			
Motor cable					
		Connecting lead up to 10 m NYY 5 × 1.5 mm ² (on-site)			
Additional connection cable					
		All cables underground NYY, e. g. 5 × 1.5 mm ²			
Electric lock connecting lead					
		NYY 3 × 1.5 mm ² (on-site) underground H07RN-F 2 × 1 mm ² on the door leaf			
Lay all cables separately!					

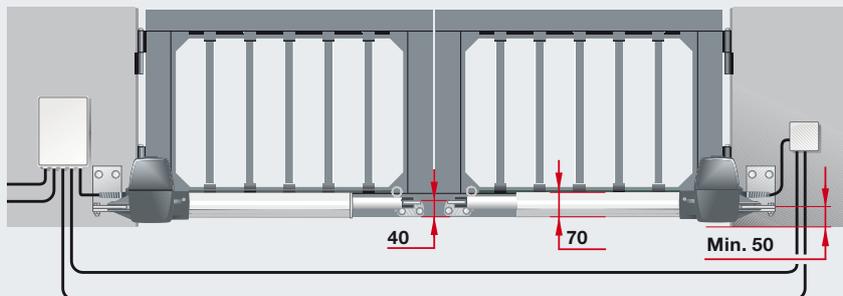

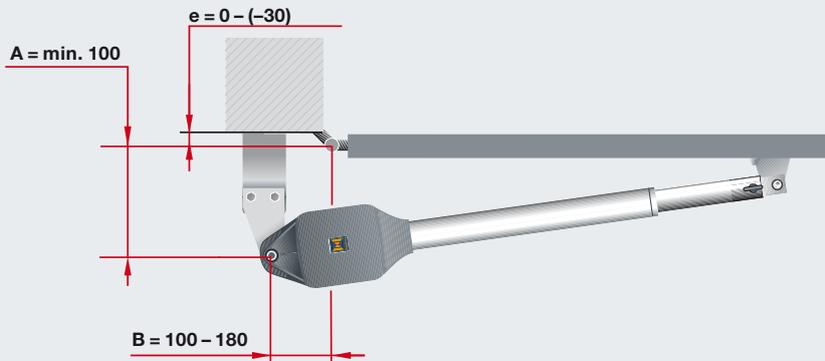

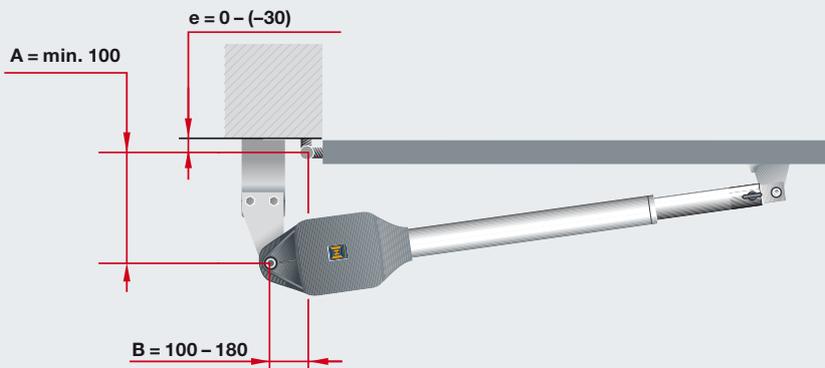

For Hörmann sales partners
The planning program for hinged gate operators
 With the planning program,
 Hörmann supports you in planning and fitting
 your hinged gate operator.

RotaMatic

Dimensions	x	x + stroke
RotaMatic / RotaMatic P	720	1120
RotaMatic PL	820	1320

To ensure optimum door travel, the maximum difference between the A dimension and the B dimension must be 40 mm.

All illustrations and information with standard tracks, additional equipment features possible.
